

WISDOM DAVID

AWS Cloud/DevOps Engineer

 wisdom.david.tech@gmail.com

 09052391191  Lagos, Nigeria

PROFESSIONAL SUMMARY

AWS Cloud/DevOps Engineer with hands-on experience building and supporting automated, secure, and cost-efficient cloud infrastructure. Skilled in AWS, Docker, CI/CD pipelines, Infrastructure as Code, monitoring, and deployment automation. A proactive learner and problem-solver who works well in teams, adapts quickly to new tools, and enjoys turning ideas into reliable, real-world solutions that improve delivery speed, system performance, and operational efficiency.

CERTIFICATIONS

- AWS Certified Cloud Practitioner 
- AWS Solutions Architect – Associate 
- KCNA: Kubernetes and Cloud Native Associate 

COURSES

WORK EXPERIENCE

ALLUVIUM

AWS Cloud/DevOps Engineer

2024 – Present

- Designed and deployed a containerized monitoring stack (Prometheus, Grafana, cAdvisor, Node Exporter) on AWS EC2 using Docker Compose
- Built Grafana dashboards and Alertmanager rules for real-time infrastructure monitoring
- Performed stress testing to validate alert thresholds and improve system reliability
- Automated container deployments to AWS ECS Fargate using Terraform, Amazon ECR, and GitHub Actions
- Implemented scalable CI/CD pipelines reducing manual deployment effort
- Developed a serverless Slack data migration solution using AWS Lambda, S3, and DynamoDB
- Designed secure VPC architecture with public/private subnets, NAT gateway, and bastion host
- Implemented DevSecOps practices using Bitbucket Pipelines for:
 - Dependency scanning
 - Secret/credential detection in commits
 - Automated security alerts via email

TINUOLA INTERNATIONAL COLLEGE

ICT Instructor | NYSC

2023 – 2024

- Taught Computer Studies to senior secondary school students during NYSC.
- Prepared students for WAEC through structured lessons, revision sessions, practical exercises, and continuous assessments.
- Developed lesson notes, practice questions, and exam-focused revision materials to strengthen students' understanding of ICT and computer science concepts.
- Provided academic support to improve student confidence and examination readiness.
- Contributed to strong WAEC performance, with approximately 80% of students achieving A1 in Computer Studies.

EDUPOINT

Robotics Mentor

2022 – 2023

- Taught robotics and coding to students, with a focus on Arduino, microcontrollers, sensors, automation, and basic electronics.
- Guided learners through hands-on projects that strengthened their problem-solving, creativity, teamwork, and presentation skills.
- Mentored and coached students for the EduPoint RoboCodeFest competition, guiding them through idea development, prototype design, testing, and presentation.

Cloud Migration Technical Delivery 
Atlassian
2024

•Co-lead the team in designing and building an automated waste management system, achieving 2nd place in the competition.

EDUCATION

OND & HND COMPUTER SCIENCE
YABA COLLEGE OF TECHNOLOGY

TECHNICAL SKILLS

CLOUD PLATFORMS & CONTAINER ORCHESTRATION

- AWS (EC2, Lambda, ECS, IAM, VPC, S3,API Gateway,ECR)
- Docker, Docker Compose, Terraform

CI/CD & AUTOMATION
Github action , Bitbucket pipeline

INFRASTRUCTURE AS CODE
Terraform

MONITORING & OBSERVABILITY
Prometheus , Grafana , CloudWatch , cAdvisor , node exporter, portainer

VERSION CONTROL & COLLABORATION
Git (GitHub, Bitbucket)

SOFT SKILLS

- Problem-solving
- Attention to detail
- Communication (written & verbal)
- Collaboration & teamwork
- Initiative & Creativity
